## CSM Energy enhances offering through new deal with WDS Limited & AGL Energy Limited

### Key points:

- Parties to jointly pursue fully integrated coal mine methane management projects
- WDS Limited bring significant mine gas planning, drainage and infrastructure construction expertise
- Builds on the existing relationship between CSM Energy and AGL Energy

CSM Energy (CSME) has signed a heads of agreement (HOA) with AGL Energy (AGL) and WDS Limited (WDS) for the cooperative development of integrated coal mine methane projects with Australian coal miners. WDS is a key market participant in coal mine degasification, providing services and related infrastructure to some of the largest coal miners in Australia. AGL has a leading position in the Australian wholesale and retail gas and electricity markets.

Under the HOA, the parties will work together to develop and deliver customised solutions to coal miners that optimise coal mine methane management and commercialisation, spanning mine planning and inception to mine closure.

Glenn Dennis, Business Development Manager at CSME commented “The arrangement significantly enhances CSME’s project development capability and offering. CSME is in a pre-eminent position to deliver truly integrated, commercially focussed, long-term mine gas management projects for coal miners.”

**About CSM Energy**

CSM Energy is a project developer offering integrated gas management solutions to Australian coal mines who want to lower their carbon footprint, recover and commercialise their coal mine/seam gas. Through the G<sub>2</sub>M<sup>®</sup> Alliance (alliance between CSM Energy and AGL Energy), CSM Energy offers the people, expertise, equipment, finance and best channel to market for gas and electricity. CSM Energy has an overriding commitment to health, safety, environment and community responsibility.

**About AGL**

AGL is Australia's leading integrated renewable energy company and is taking action toward creating a sustainable energy future for our investors, communities and customers. Drawing on over 170 years of experience, AGL operates retail and merchant energy businesses, power generation assets and an upstream gas portfolio. AGL has one of Australia's largest retail energy and dual fuel customer bases. AGL has a diverse power generation portfolio including base, peaking and intermediate generation plants, spread across traditional thermal generation as well as renewable sources including hydro, wind, landfill gas and biomass. AGL is Australia's largest private owner and operator of renewable energy assets and is looking to further expand this position by exploring a suite of low emission and renewable energy generation development opportunities.

**About WDS Limited**

WDS is a leading integrated provider of specialist development, design, engineering, construction, fabrication and maintenance related services to the energy, mining and infrastructure sectors.
